## **Press Release**

**7 February 2008**

### **Updated Mineral Guide from Jost Chemical Company, USA**

Hawkins Watts today announced the release of the new Jost mineral guide, from Jost Chemical Company, USA.

The Jost guide summarises the complete product range, including Calcium, Copper, Iron, Magnesium, Manganese, Potassium, Sodium and Zinc salts. It also includes useful information on the various hydrate forms, solubilities, metal content and taste.

Jost Chemical Company manufactures high purity minerals that meet or exceed exacting pharmaceutical standards, such as USP and EP.

“This information makes mineral selection much easier, especially when it comes to predicting in advance what effect mineral addition will have on flavour” said Alan Bulmer, Jost Product Manager for Hawkins Watts Ltd. “Jost are very focused on manufacturing fully reacted minerals with exceptionally low levels of incidental constituents .This new mineral guide is another useful tool from Jost, the market leader in premium quality minerals,” he said.

Hawkins Watts Ltd represents Jost Chemicals in New Zealand.

The Jost Mineral guide for Minerals is available for downloading at;
